WHY CHOOSE A BATHTUB NOVELLINI

MADE IN
ITALY

100% MADE IN ITALY

All our products are manufactured in our factory in Mantua, Italy. The control of the entire production line allows us to ensure the highest level of quality of the finished products and components used.

CUSTOMER SERVICE CLIENT

Our team works daily to offer customised solutions to your requests and answer your questions. With our commitment to improving the quality of our services, we are committed to providing technical support to all our customers and users of our products.

LOCATION / Borgo Virgilio - Mantua - Italy

KNOW-HOW

With a proud history of over 50 years, Novellini has become a leading brand in the European bathroom market, popular with professionals and consumers alike. From the very beginning, we have relied on the best technologies and the latest design trends to provide you with a unique experience of well-being.

EQUIPMENTS

Depending on the version, your bathtub will be delivered with all the necessary equipment for its installation: feet or self-supporting frame, headrest cushions, automatic drain, tapware or filling system through the drain. All our baths are available with or without whirlpool massage.

NORMS

All our products are designed and manufactured to comply with the latest European quality and safety standards. From the raw materials to the finished products, including the assembly of the various components, each phase is carefully planned, checked and verified to guarantee characteristics that meet the maximum standards required by the European authorities.

MATERIALS

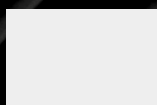

**WE USE THE HIGHEST QUALITY MATERIALS
SO THAT YOUR BATHTUB CAN GIVE YOU COMPLETE
SATISFACTION**

SYNTEK

This reinforced synthetic material allows us to create a wide variety of designs. It is pleasant to the touch and easy to care for, has excellent insulating properties and provides exceptional comfort as it quickly adopts the temperature of the bath water. The surface of Syntek is naturally non-slip and guarantees an optimal grip. Tested with a degree of inclination greater than 18° for the glossy white finish and 24° for the matt white finish, our bathtubs meet the PN18 and PN24 standards respectively. Available with the Divina, Sense, Classic and Comfort collections.

glossy white
classic

matt white
exclusive, with a soft and silky appearance

NOVOTECH

Extremely solid and highly aesthetic, this exclusive material contains a high percentage of natural mineral fillers and high purity resins. Thanks to its extraordinary qualities, it allows us to create organic and sinuous shapes with a dynamic and sensual STYLE. The solidity of Novotech gives maximum stability to the island baths. Its smooth and silky appearance is a real delight to the touch. Available with the Novotech collection.

matt white

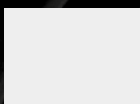

TABLIERS

We offer a wide range of apron finishes to give your bathroom a traditional or new look. Our aprons are water resistant and have a solid design that ensures they will last for years. The aprons are available in finishes that match our furniture collections.

DESIGN

THE DESIGN AND VISUAL PLEASURE CONTRIBUTE TO YOUR WELL-BEING.

THAT IS WHY WE CALL ON THE BEST DESIGNERS TO DEVELOP THE SHAPES AND ERGONOMICS OF OUR BATHTUBS.

MARCO PELLICI
DESIGNER

SIMONE MICHELI
DESIGNER

MASSIMO FARINATTI
DESIGNER

We bring Made in Italy design excellence to the centre of your bathroom space. Our designers conceive environments and individual elements in such a way that you feel well from the very first glance. Concepts of comfort and ergonomics are combined with STYLE and aesthetic vision to create the bathroom of your dreams.

ALL THE PLEASURES OF MASSAGE

Our range of massages
will satisfy your desires.

Relax, tone up or take care of your skin
Among our MASSAGE SYSTEMS,
you will certainly find the one that will perfectly
meet your
your wellness needs.

SILENCE

A whirlpool bath is a privileged moment that allows you to devote yourself fully to your well-being. This is why we pay particular attention to sound comfort. The pumps and blowers of our baths are designed to preserve serenity during your bathing sessions and let you be lulled by the gentle sound of moving water.

YOUR WELL-BEING IN A SINGLE GESTURE

Whichever collection you choose, you'll love how easy it is to use the massages. We have designed our keypads and remote controls to give you easy access to all the functions.

OUR MASSAGE SYSTEMS

AIRPOOL

*Are you looking for a relaxing solution?
> Opt for **Air** massages.*

The air caresses the body and has a gentle relaxing effect. The air bubbles give you a feeling of lightness, fight fatigue and reduce stress. The air is projected through the injectors in the bottom of the bathtub.

WHIRLPOOL

*Do you prefer WHIRLPOOL and stimulating massages?
> Turn to **water** massages.*

Water provides a deep massage that improves blood circulation and reduces muscle tension. Water massages eliminate toxins and help to firm the skin. The intensity of the water massage can be adjusted by means of jets on the vertical walls of the bathtub, which are connected to a pump.

TAKING CARE OF YOUR BATH

It is important to take CARE of your bathtub to enjoy its benefits for many years.

AUTOMATIC DEWATERING

All of our Air systems are equipped with an automatic drying system which is activated when the bathtub is emptied to purge the air circuits and remove any water residues and impurities.

DISINFECTION

It is essential to clean the water pipes of your bath regularly (every 8 to 10 uses). To do this, we recommend using products that are suitable for whirlpools and that protect the equipment. Rinse your bathtub, fill it with water, add the disinfectant and start the disinfection programme or simply a water massage if your bathtub does not have a special programme.

AIRPOOL AND WHIRLPOOL

*Would you like to enjoy all the benefits of BATHtherapy?
> Treat yourself to the **Mixte** system massages.*

The combination of the water and air systems, the mixed massage fulfils all your wellness needs and offers you the relaxing benefits of air and the invigorating properties of water. The bathtub has water Jets on the vertical walls and air injectors at the bottom.

NATURAL AIR

*Would you like to give your skin a rejuvenating bath?
> Our exclusive **Natural Air** care system is for you.*

The Natural Air system combines the pleasures of a relaxing bath with skin care. Thousands of micro-bubbles of air mix with the water jet and form a delicate cloud of oxygen that cleanses the skin and improves its elasticity. One or two micro-bubble diffusers are placed on the walls of the bathtub.

NATURAL AIR AND WHIRLPOOL

*Do your desires change according to the rhythm of your life?
> Our **Natural Air+Whirlpool** system will perfectly match your needs.*

The Natural Air treatment will revitalise your skin, while the Whirlpool Water massages will tone and energise your body. It is up to you to decide whether you want a relaxing break or a deep massage session, depending on your mood. The bathtub has water Jets on the side walls and one or two micro air bubble diffusers.

TECHNOLOGY NATURALAIR

The micro air bubbles, up to 100 times smaller than the air bubbles produced by an air system, saturate the water, transforming it into a soft mixture and giving it the appearance of a delicate milk bath.

They adhere to the skin, removing impurities, dead cells and sebum. The soft feeling on the skin lasts all day and a session of only 20 minutes is enough to obtain the maximum benefit.

The oxygen released by the Natural Air system stimulates the production of collagen, an important protein in our body, which plays an essential role in the functioning of organs and tissues. Collagen augmentation is a natural anti-ageing remedy that reduces wrinkles and smoothes your skin to restore its vitality.

THERE IS NO NEED
TO TRAVEL THE WORLD
TO FIND
INNER PEACE.

YOU CAN FIND YOUR HAVEN OF PEACE AT HOME.
DIVE INTO YOUR BATH AND LET THE MAGIC OF THE WATER WORK.
A 15-20 MINUTE SESSION IS ENOUGH TO RESTORE YOUR SERENITY
AND RESTORE YOUR VITAL FORCES.

WELL-BEING

TO MAKE EACH OF YOUR WHIRLPOOL SESSIONS UNIQUE, OUR BATHTUBS OFFER YOU THE FUNCTIONS THAT WILL TAKE YOU INTO A REAL BUBBLE OF WELL-BEING

MUSIC

Listen to your favourite music during your bath.

Bluetooth

The Bluetooth connection allows you to connect your smartphone, tablet or PC to the bathtub to play your playlists. You can control your music from your playback device. Bluetooth technology is used in the Divina and Sense bathtubs.

Radio RDS

Stay tuned to your favourite radio programmes! You can manage your radio channels from the remote control. The RDS radio function is available with Sense bathtubs.

CHROMOLIGHT

Liven up your moments of relaxation with multicoloured lights diffused in the bath water. Relaxing, energizing or enchanting... you can let the colours pass by or choose the colour you prefer.

COLLECTION **STYLE**

STYLE AND EFFICIENT MESSAGES

This brand new line of bathtubs surprises with its clean lines and soft curves. The interior volumes are designed to provide you with the best comfort. The powerful water and air massages will help you rediscover the natural sensations of water.

The round water jets can be turned in different directions and allow the areas of the body that need to be stimulated to be targeted. The jets are finished to match the bathtub. The inside of the jets and their contour are backlit in the Whirlpool+Disinfection+Light, Hydro Plus and Natural Air +Whirlpool versions.

The ergonomic control panel provides easy access to all functions of your BATH. The finish matches that of the BATH. A simple touch is all it takes to access your favourite massages.

The bathtubs have a large surface for bath products and taps.

In order to assert its strong character, this line of BATHS offers a wide choice of aprons: HPL panels in WOOD or CLAY finishes, and a real innovation, the MDi cladding panels with a natural look. The Frame frame can be added to these panels.

COLLECTION **DIVINA**

DESIGN AND PLEASURE

The Divina collection is the star of Novellini's bathtub range and is distinguished by its soft, elegant lines. The original design of these baths with bevelled edges is underlined by the quality and nobility of the materials.

Easy to use, they offer a range of water and air massages. A pleasure for the body and the eyes guaranteed!

Intuitive touch-sensitive keypad integrated in the edge of the bathtub. Simply press a button to activate the desired function.

The blade-shaped water jets ensure total body envelopment.

To better target the areas of the body that need to be stimulated, these jets can be oriented.

The jets are backlit in the Hydro Plus and Natural Air+Whirlpool versions.

The air injectors placed in the bottom of the bath are flush and almost invisible providing greater comfort to your bath.

All Divina bathtubs have a practical click-clack drain. The drain cover is finished to match the bathtub.

BATHTUB EDGE FITTINGS

Constant flow, variable temperature
- waterfall filling spout
- hand shower with anti-drip hose
Finishes: chrome or black

OVERFLOW FILLING

This system combines the filling and overflow functions and replaces the classic spout to provide you with a more comfortable experience.

OBJECT SHELF

Shelf to be fixed to the edge of the bathtub. Its internal structure makes it exceptionally strong and the polyurethane coating makes it pleasant to use.

Suitable for all bathtubs in the DIVINA collection.

OBJECT HOLDER TRAY

The tray can be placed in any position you wish. Its solid construction makes it particularly stable. Suitable for DIVINA 35, DIVINA and DIVINA F baths.

BATH SCREENS

The DIVINA 35 and DIVINA rectangular bathtubs this bath is perfectly suitable for any bath screen, can be complemented with bath screens from the Novellini range:

YOUNG TV : bath screen with 1 pivoting flap

YOUNG 1 BSV: 1-panel bath screen, pivoting and folding

6 mm thick glass. WHITE, Silver, Chrome or Matt Black profiles. An adaptation kit is required for installation

KIT HYDROSILENCE

The turbines and pumps in our baths are soundproofed so you can enjoy your massage. The Hydrosilence kit further reduces noise and vibration to make your whirlpool sessions even quieter.

COLLECTION **SENSE 2.0**

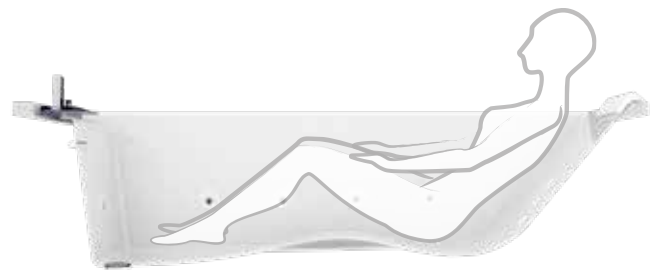

VARIETY OF JETS AND FULL BODY MASSAGES

The Sense 2.0 collection has been designed to offer you perfect comfort and a timeless aesthetic.

The placement of the jets has been designed to act on the sensitive areas of your body and provide maximum relaxation. The combination of air and water massages will meet your expectations in terms of relaxation and vitality.

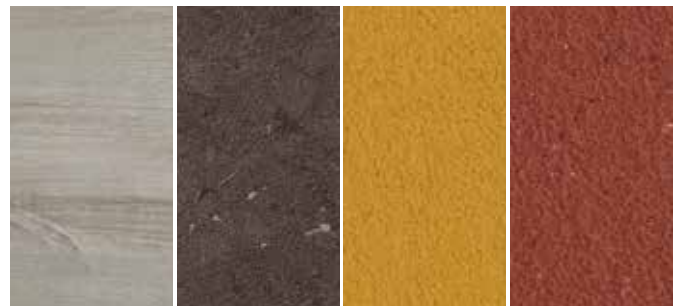

The chrome-plated water JETS can be turned in different directions and can be used to target the areas of the body that need to be stimulated. The inside of the JETS and their outline are backlit in the Whirlpool+Disinfection+Light, Hydro Plus and Natural Air +Whirlpool versions.

The jets are positioned to stimulate the reflex zones of your body, with particular attention to the back and plantar zones. In addition, the MODEL Sense 3 2.0 has the morphological chair-length base that allows the body to adopt the best position for an effective massage.

The ergonomic control panel provides easy access to all functions of your bathtub. Its finish matches that of the bathtub. A simple touch is all it takes to access your favourite massages.

In terms of design, the Sense 2.0 line offers aprons in HPL WHITES or in natural finishes: WOOD or CLAY.

COLLECTION NOVOTECH

EXCLUSIVE DESIGN AND NOBLE MATERIALS

This exclusive collection is a real gem. Made of Novotech, a material with a high percentage of natural mineral fillers and high purity resins, it offers 2 models of bathtubs with soft and sinuous shapes. Particularly solid, these bathtubs have surfaces with a silky touch. A real pleasure for the eyes and the senses!

The interior of the bathtubs is finished in Matt white. The exterior can be customised in 18 colours to suit the most refined tastes. It is up to you to choose between warm and enveloping tones or strong and decisive ones.

The interior of the BATHs is finished in Matt white. The exterior can be customised in 18 colours to suit the most refined tastes. It is up to you to choose between warm and enveloping tones or strong and decisive ones.

The Natural Air system that can be added to your bathtub from the Novotech collection offers the CARE massage with micro-bubbles of air with a regenerating and relaxing effect. To allow you to enjoy your wellness experience, the interior shapes of the bathtubs have been designed to offer you optimal immersion.

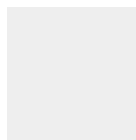

To create an intimate atmosphere, the bathtubs can optionally be equipped with LED lighting.
